In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2017-2018

Unique Reference:

The documents are stored in the https://github.com/brianpesy/turtlios.

https://github.com/brianpesy/turtlios/tree/master/02%20-%20Requirements%20Engineering

Document Purpose:

This document is for further explaining different functionalities within the program to a more specific and clear extent while also maintaining readability as well.

Target Audience:

Businesses, clients, and those people who are interested in the whole project and how exactly we are going to go about designing the whole project are within the scope of our target audience.

Revision Control

History Revision:

| Revision Date	Person Responsible	Version Number	Modification
10/08/17	Joan Nicole Balugay	1.0	Initial document, document purpose, target audience, use case name, description, precondition, diagram, postcondition, relationships, and special requirements

Use-Case Name: 3.0 Delete note

Description: For this use case, it will show how a note is deleted. When a note isn't needed anymore, all the files and pictures associated with the note and whatever edits that were placed on there will be deleted as well from the server.

Preconditions: There should be an existing note, for the user to be able to delete one.

Flow of Events:

Scenario Name	Description
Scenario 1 User deletes a note	1. The user decides to delete a note. 2. The note will be deleted from the server.

Activity Diagram of the Flow of Events:

Postcondition: The note is deleted from the server and cannot be retrieved anymore.

Relationships: NONE

Special Requirements:
NONE
